LANDSAILING

If you don't have sand in your face...
You're not trying hard enough!

What is a Blokart?

INNOVATIVE DESIGN - FUN & SPEED

Blokarts are ideal for new or experienced sailors because they are easy to learn, but challenging to master - they can sail in light winds, yet also reach high-performance sailing speeds of 90 km/h. Nimble and maneuverable, all you need is a firm surface the size of four tennis courts to sail.

DURABLE BUILD

We know wind can often bring rough weather, so we made our Blokarts durable and rust resistant. All Blokarts come with a Pro Chassis frame, made from anti-corrosive, 304 stainless steel. Blokarts are easy to clean, just give them a hose down after sailing. Each Blokart comes with maintenance tips and a one year manufacturer's warranty.

COMPACT SIZE

Blokarts transport easily and can full pack down, including a mast and sail, into its own carry bag that measures just 120 x 80 cm. Each Blokart also comes with instructions for assembly in a matter of minutes without any special tools.

This means sailors can fit their Blokarts into a car trunk for week-ends away, or as checked airplane baggage for worldwide competitions.

SAILS

Blokart sails come in four different sizes - 2M0, 3M0, 4M0, and 5M5 - so you can swap sails according to the wind strength or sailor's body weight. All sails are made from dacron sail cloth, with reinforced mylar for the clear leach panels, and tapered fiberglass battens.

For new sailors who want to start with a single sail, we recommend the 4M0 sail. This is a great option for most wind speeds and body types. For more flexibility, we recommend having both the 5M5 and 3M0 sails. These two serve as an ideal companion set so you can alternate depending on the sailing conditions.

MASTS

Blokart masts are made up of sections that fit snugly together, making the Blokart easy to assemble, and to add or remove sections to accommodate various sail sizes. The base section of the mast is the largest, followed by subsequently smaller sections called 3rds, 2nds, and a Tip at the top of the mast.

ACCESSORIES

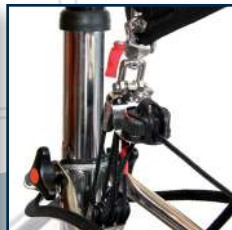

The Blokart comes with a lot of accessories such as: Shadow 2-Seat, Carbon Mast, Ratchet Pulley, Mast Crane, Ice Skates and many more...

POD COMPLETE
All-weather sailing machine.

WIND INDICATOR
Wind Indicators are an essential apparatus.

ULTRA DOWNHAUL
Adjust your downhaul while sailing.

FOOTBAR EXTENSION
For tall sailors.
